GIVE YOUR PRODUCTION A LIFT

KOHLER INDUSTRIES
HYDRAULIC COMBO
DUMPER

Budget friendly and built to order, the Kohler Combo Dumper is constructed for your needs. Simply stated, it provides the performance you expect from industrial food processing equipment.

The heavy-duty, stainless steel fabrication can lift 3,000 pounds of product, and tilt to dump between 60-78" high. The carriage can support all common container sizes, or be modified to suite. Further customize your carriage with straight or curved sides and your choice of adjustable or fixed restraining bar.

Grounded with multiple floor bolts, the cushioned valves prevent bouncing and shaking for smooth operation. Side guards alleviate pinch points as contents are dumped in a short cycle time, ensuring worker safety and efficiency.

A valued team workhorse, the Kohler Combo Dumper is constructed to handle long hours of heavy lifting, year after year. No paint to chip, no tin to rust. Our glass bead finish, stainless steel construction maintains sanitation standards while resisting wear from heavy use and frequent wash down.

With years of experience in the food processing equipment industry we understand the shortcomings of current equipment offerings. Our team has the flexibility to customize the equipment to your production needs. Allow our in-house team of engineers, fabricators, and consultants can construct a combo dumper to meet your exact requirements. Get started today.

Our dedicated team works with you from start to finish. We listen to your production requirements and develop solutions for your unique needs.

New equipment from Kohler is simple and standardized; no proprietary parts here! Preventative maintenance and repairs are straightforward. Parts are typically on hand to reduce your downtime and keep your operation moving.

Designed for longevity, we build every machine to last. They simply won't quit. For this reason our machines retain value over time better than any other manufacturer.

WHY KOHLER INDUSTRIES? **LIFTED PERFORMANCE**

CUSTOM SPECS

Your product is unique. It's only natural your equipment be too. Our in-house design and assembly teams tailor-build all machines to your needs.

QUICK DELIVERY

Our 33,000 sq. ft. facility allows for fast turnaround on new equipment. We work hard with precision and speed to ensure a quick delivery.

IN STOCK PARTS

We keep the parts you depend upon in stock, ready to ship. This reduces your downtime and keeps your operation running smoothly.

CUSTOMER SERVICE

We are here for you. Speak with a real person when you call. We'll provide world class customer service and support to your team.

EXPERIENCE

With over 100 years of combined industry wisdom, put our expertise to the test. Let us show you what's possible in your equipment.

MADE IN USA

Born in the Midwest, all our equipment is made in the USA to ensure top quality. We oversee every aspect of production.
