KOHLER INDUSTRIES HIGH-SPEED PEPPERONI SLICER

SLICING GREATER YIELDS

The Kohler High-Speed Pepperoni Slicer is designed for continuous operation, eliminating the need for manual loading, thus cutting labor costs. It contains a maintenance friendly single belt system that outpaces traditional multi-lane slicers by maximizing output and usable product. Customer's have reported up to 5% increase in yields over comparable slicers.

INNOVATING BETTER DESIGNS

We've pioneered state of the art advancements on the Kohler Slicer, including our cutting edge Automatic Reject System, which consistently removes and disposes of unusable slices that were previously sorted by hand. Our slicers include standardized parts that we keep in stock to lower your cost of ownership.

MEETING HIGHER STANDARDS

The Kohler Slicer presents premium food safety features throughout. The solid stainless steel frame reduces risk of harboring bacteria and provides long lasting durability for a higher return on your investment.

Get more per slice with the Kohler High-Speed Pepperoni Slicer.

Meat logs automatically advance through the high-speed, rotating blade for continuous, non-stop slicing. Our Automatic Reject System discards unusable slices, maintaining slice integrity while minimizing product loss.

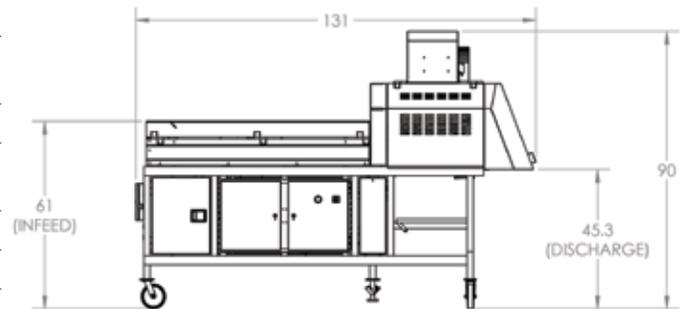

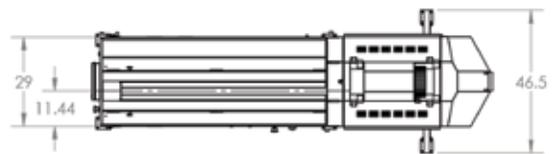

Pair with an optional, customized infeed conveyor to automatically load meat sticks into the slicer and eliminate hand feeding. This maximizes your operations and reduces contamination risk.

PRODUCT TYPE	Suitable for meat sticks (such as pepperoni and dry sausage) fed end-to-end in a single lane
PRODUCT DIAMETER	Maximum 2.4" (63mm) diameter
PRODUCT LENGTH	Minimum 40" (1016mm) long
PRODUCT TEMP	28°F - 32°F (-2°C - 0°C) for optimal yield
YIELD	Continuous operation yields 21,000 - 30,000 slices per minute (blade type and speed dependent)
TOLERANCE	Thin cut: 18 count at +/- 2 grams Cracker cut: 6 count at +/- 5 grams
BLADE SPEED	2,000 - 5,000 RPM
BLADE TYPE	6-arm standard, different configurations available
REJECT SYSTEM	Included: isolates unusable slices and log ends
CONSUMABLES	Daily blade replacement or sharpening expected (product type, temperature and volume dependent)
POWER	480 volts, 20 amp, 3-phase standard
CONTROLS	HMI, rear-mounted with password user logins, program to store product recipes and slicer settings
INFEED	61" (1549mm) high, standard
DISCHARGE	45.3" (1151mm) high, standard
OVERALL DIMENSIONS	152.68" long x 43.49" wide x 74" tall, standard (3878mm long x 1105mm wide x 1880mm tall)
WEIGHT	3,180 pounds (1442 kg)
SAFETY	Safety guards and switches are standard
SANITATION	Easy washdown, clean design
MATERIAL	304 solid stainless steel frame, components and motors
LOAD/UNLOAD CONVEYOR	Automatic infeed (pictured below) and discharge conveyor options available
SUPPORT	Remote support included, field service available
ORIGIN	Designed and built in the USA by Kohler Industries

WHY CHOOSE US?

CUSTOM SPECS

Your product is unique. It's only natural your equipment is too. Our in-house design and assembly teams tailor-build all machines to your needs.

IN STOCK PARTS

We keep the parts you depend upon in stock, fairly priced, and ready to ship quickly. Let's keep your operation running smoothly.

CUSTOMER SERVICE

Our customers are our partners. When you win, we win. As such, speak directly with our industry experts, engineers, and technicians at any time.

EXPERIENCE

We're not just saying we make the cut, we are industry experts. Our leadership team has over 100 years of combined industry wisdom.

BUILT TOUGH

We build rugged, dependable equipment that lasts. Benefit from lower maintenance costs, shorter downtimes and reduced long-term inventory rates.

MADE IN USA

Born in the Midwest, all our equipment is made in the USA to ensure top quality. We oversee every aspect of production.

PEELER+SLICER SYSTEM
